STARTING FROM £13,995+VAT!

Customer Information

Securing Your Build Slot:

The V-Storm is manufactured in batches of 10 chassis. This ensures the exclusivity of the car, whilst allowing us to tightly control costs and offer excellent after service during your build and once on the road. This approach enables us to obtain the best prices from our suppliers which we share with you, our customers. The V-Storm therefore represents excellent value for money and is competitive on price with equivalent products.

Based on current customer demand, we produce 2-3 batches of 10 vehicles annually. The initial batch of 10 is fully allocated and the second batch is currently selling well. If you are intending to purchase a V-Storm soon please do contact us to ensure that you can secure the slot and delivery schedule that you want, otherwise you risk delay until the next batch is allocated, which is likely to be Spring 2009.

Ordering Your Kit:

To place your order you will need to do the following:

- 1) Pay a deposit of £1,000 or 30% of the value of your order, whichever is greater.
- 2) Complete, sign and return the order form with your deposit.
- 3) Read and accept the terms and conditions of sale.
- 4) Deposits can be accepted by cash, most credit and debit cards, and cheques subject to clearance.
- 5) The balance of order value may be paid by any of the methods above, however credit cards will attract a 3% surcharge to cover credit card transaction costs.
- 6) There is a 14 day cooling off period from the date of your order. After this time deposits are not refundable as production of your kit is likely to have begun and costs will have been incurred.

Conditions

We reserve the right to alter the contents of the packages to parts equal or better in specification, or change the prices and contents any time. SDR Sports Cars Ltd has a policy of continuous product testing and development.
